

Elnur Maharramov

SOFTWARE DEVELOPER

I am a skilled web developer with expertise in HTML5, CSS3, JavaScript, and TypeScript. I create responsive applications using ReactJS, NextJS, and Redux. I have experience with NodeJS, ExpressJS, MongoDB, SQL, and MySQL for back-end development. Proficient in version control with GIT and Github, I also have a strong foundation in Python, R, and machine learning frameworks like Keras and Tensorflow. My skills include using Docker for containerized environments. I am committed to delivering high-quality web solutions and continuously expanding my knowledge.

Work Experiences

Frontend Intern - Proton LLC (04.2022 – 07.2022):

I create web sites according to given templates and I solved given tasks by using JavaScript, HTML5, CSS3 and Bootstrap 5.

Python mentor - DataScience Academy (07.2022 – 09.2022):

I helped to students to understand given tasks and I also checked their homeworks.

Fullstack Developer – TaskRider (03.2023 – 01.2024):

I use pure JavaScript to create backend and I also used ExpressJS. Basically, I created front side of some web sites from zero by using ReactJS and NextJS, here I created some backend APIs with NextJS.

Frontend Developer – Taskilled (05.2023 – 09.2023):

Here I was responsible for responsive design, I made responsive site by using ReactJS, Mantine.dev. I also created some pages.

Backend Developer – Insightify (06.2023 – 08.2023):

Here I created cdn with NodeJS/ExpressJS. And I used NextJS for the main backend. Then I used Docker and pm2 to deploy this site on AWS.

RPA Developer – UpSystems LLC (07.2023 – 01.2024):

I create bots to do very easy jobs for people. I use basically Automation Anywhere Control room to create bots, forms and processes. I also create co-pilot bots. Here I use some tools for Generative AI such as Document AI (IQ bot) for documents.

Data scientist intern (France) – IRIMAS laboratoire (01.2024 – 05.2024):

I read scientific papers and implement deep learning models for time series. I plot the results and compare them with results of other experiments.

Fullstack Developer – AgileSolutions LLC (08.2024 – present):

I work on multiple CRM and Dailer projects (about 20 projects). I use NodeJS for backend and ReactJS for frontend. I use RabbitMQ to manage social media messages.
